DETAILED ACTION

Response to Arguments

Applicant's arguments filed 1/30/2008 have been fully considered but they are not persuasive.

The Applicant argues that the token header formed by combining token header of variable lengths and header having the lowest occurrence of generation.

Yokoyama discloses the combining of headers see Fig. 9 & Fig. 2 and further discloses the header recording information regarding frame significance and it being lower than the threshold see Col 6 Ln 27-33.

The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.

Claim Rejections - 35 USC § 103

Claims 1-10 are rejected under 35 U.S.C. 103(a) as being unpatentable over US Patent 7164755 to Yokoyama in view of US Patent 6671567 to Dwyer et al.(hereinafter Dwyer).

Regarding Claim 1, 9-10, Yokoyama discloses the storing a voice signal outputted from a vocoder of the wireless communication signal for a predetermined time see Fig. 1 item 12 & 2; selecting at least one of the signal values among which the occurrence of generation is lower than a threshold value to generate a token header data see Fig. 11 item S7; combining token header data of variable lengths to form a token header and

generating a token including the token header, the token header data having the lowest occurrence of generation among voice data outputted from a vocoder of the wireless communication terminal see Fig. 2 item 210. But does not disclose the transmission terminal, receiving a request for a secure communication from a user and transmitting the token to a reception terminal and at the transmission terminal, entering into a secure communication mode based on an acknowledge token transmitted from the reception terminal, and performing secure communication with the reception terminal. However, Dwyer discloses the transmission terminal receiving a request for secure communication from a user and transmitting the token to a reception terminal and at the transmission terminal, entering into a secure communication mode based on an acknowledgement token transmitted from the reception terminal see Fig. 14 item 14 & 18 & Col 9 Ln 56-64.

Page 3

It would be obvious to one having ordinary skill in the art at the time of the invention to include the transmission terminal receiving a request for secure communication from a user and transmitting the token to a reception terminal and at the transmission terminal, entering into a secure communication mode based on an acknowledgement token transmitted from the reception terminal in the invention of Yokoyama in order to have secure channel for communication between receiver and transmitter.

Regarding Claim 2-8, Yokoyama disclose the details of the header being included including keys, ID information and transmitting repeated times based on acknowledgement packet see Fig. 4 & Col 9 Ln 11-39 & Col 7 Ln 20-41.

Art Unit: 2132

Conclusion

Page 4

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a). A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the mailing date of this final action.

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Venkat Perungavoor whose telephone number is (571)272-7213. The examiner can normally be reached on 8:30-5:00. If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Gilberto Barron can be reached on 571-272-3799. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
